3 Definitions

Terms used in the Plan and otherwise defined in the Resource Management Act 1991 (RMA) or other legislation are included in this section for information purposes only. They do not form part of the Plan, and are identified as shaded paragraphs. Where reference is made to a term being defined in legislation other than the RMA, that other legislation should be checked to ensure the intended meaning of a particular term.

able to be relocated
The activity, building or structure is able to be practically moved as follows:-

a) For subdivision –
   i) an alternative building site; or

b) For land use:-
   i) Where the site does not contain an alternative building site of 325m² nett site area, the activity, building or structure shall be able to be practically moved as far landward as possible within the site, while complying with the bulk and location rules of the Plan; or off-site clear of the Coastal Hazard Erosion Plan Area. Such land as is available for relocation shall remain vacant for the purposes of relocation as and when required;
   ii) Where the site does contain an alternative building site of 325m² nett site area the activity, building or structure shall be able to be practically moved and located on that alternative building site.

accessory building, structure or activity
A building, structure or activity which is detached from, and the use/operation of which is incidental to, that of any principal building or activity that may be established as a permitted activity on the same site, and in relation to a site on which no principal building has been erected, is incidental to the activities which may be established as a permitted activity on the site. This term does not include a secondary independent dwelling unit or ancillary retail and offices, or a caravan or other mobile forms of accommodation.

accommodation unit
A building, or part of a building designed or used for habitation. For the purposes of the Plan, units that are self-contained through the provision of habitable rooms, kitchen and ablution facilities will be counted as one accommodation unit. Where accommodation is not self-contained, each area of 65m² of gross floor area (GFA) of all habitable rooms shall be counted as one accommodation unit.

active frontage
The frontage of a building to the road, typically of a commercial nature, that is designed to provide for access, interaction between the activities within the building and the public space in the road, or for the display of the actual goods and services for sale within the building.

activity/activities
Means the development or use of any land for a particular purpose, and includes any erection, construction, alteration of, or addition to, any building or structure on the land; and the carrying out on the land of any excavation or other works associated with that use and development.

adjoining (in relation to Special Ecological Areas)
Any area within 5 metres of a Category 1 Special Ecological Area (as measured from the boundary of the Special Ecological Area as shown on the Plan Maps (Part B)).

aerial
The yagi or whip type device that receives or transmits radio communication or telecommunication signals and includes the aerial mountings to any building or structure, but not any supporting mast. This definition excludes any antenna.

agrichemical
Means any substance, whether organic or inorganic, manufactured or naturally occurring, modified or in its natural state, that is used for any agricultural, horticultural or related activity, to eradicate, modify or control flora or fauna.

aircraft operations
Includes aircraft taking off, landing and taxiing, but does not include ground-based activities at an airport.
alternative building site
Means either:-

a) Where the whole of the building to be relocated lies within the Coastal Hazard Erosion Plan Area - vacant land comprising a minimum area of 325m² nett site area which is located contiguous with, but clear of the Coastal Hazard Erosion Plan Area and the site of the consented activity, building or structures, shall be provided so that the building and structures to be relocated to the alternative building site can comply with the bulk and location rules of the Plan; or

b) Where the building to be relocated lies partly within the Coastal Hazard Erosion Plan Area and partly outside of the Coastal Hazard Erosion Plan Area - an area of land comprising a minimum area of 325m² nett site area which is located contiguous with, but clear of, the Coastal Hazard Erosion Plan Area and the site of the consented activity, building or structures shall be provided so that the building and structures to be relocated to the alternative building site can comply with the bulk and location rules of the Plan.

amateur radio configuration
The antennas, aerials (including rods, wires and tubes) and associated supporting structures which are owned and used by licensed amateur radio operators.

ancillary retail and offices
Means any retail or office premises on the same site as another principal building or activity, and whose use is incidental to that principal building or principal activity (e.g. a retail showroom attached to a manufacturing premises), provided this definition shall exclude service stations.

animal saleyard
Means land and buildings used for the sale of farm animals.

annual exceedence probability (AEP)
The probability that a given rainfall total, accumulated over a given duration, will be exceeded in one year.

annual recurrence interval (ARI)
The average, or expected, value of the periods between a given rainfall total accumulated over a given duration being exceeded.

antenna
Any device including any dish or panel but excluding aerials, that receives or transmits radio communication or telecommunication signals. This includes the antenna’s mountings (including any support structure or head arrangement) and radio frequency unit or similar device, but excludes any mast.

The diameter or area of an antenna means:

a) In relation to any panel antenna or any other type of antenna that has a length and a width, the area measured by calculating the largest surface area;

b) In relation to any other antenna, the diameter measured by taking the cross-section of the widest part of the antenna.

The mountings of any antenna and any radio frequency equipment or similar device shall not be included in the measurement of area or diameter of each antenna, provided that the radiofrequency unit or similar device is smaller in area or diameter than the antenna itself.

Note: Any antenna only need meet the area or diameter measurement, as appropriate to the type of antenna, and the measurement is of each individual antenna and is not a cumulative measurement.

approved earthworks
Means:

a) Earthworks that have resource consent under the Bay of Plenty Regional Council Regional Water and Land Plan;

b) Earthworks in accordance with the conditions of any subdivision consent granted by the Council;

c) Granted in accordance with the conditions of any land-use consent imposed by the Council;

d) Earthworks having a permitted activity status under the Plan.
archaeological site

Has the same meaning as contained within Section 2 of the Historic Places Act 1993 which means a site that:

a) Either:
   i) Was associated with human activity that occurred before 1900; or
   ii) Is the site of the wreck of any vessel where that wreck occurred before 1900; and

b) Is or may be able through investigation by archaeological methods to provide evidence relating to the history of New Zealand.

artificial crop protection structures

Means structures of cloth used to protect or cover crops.

bar

That part of licensed premises which is used principally or exclusively for the sale, supply or consumption of liquor.

beach replenishment, nourishment and restoration activities

Activities that involve beach replenishment, nourishment, restoration, sand movement and includes:

a) Approved Regional Coastcare and beach nourishment programmes;

b) Maintenance and replacement of dunal vegetation;

c) Erection, construction or extension of:
   i) Monitoring equipment such as sea level datum posts;
   ii) Sand ladders and exclusion fences, and associated signs;

d) Activities associated with the re-spreading of sand within the Coastal Hazard Erosion Plan Area in accordance with the provisions of Chapter 8 – Natural Hazards.

biodiversity

Has the same meaning as biological diversity contained in the Resource Management Act 1991 (RMA) which means the variability among living organisms, including diversity within species, between species, and of ecosystems.

boundary

Means:

a) In relation to fee simple subdivision or Maori land partitions, the lot, section or Maori block or partition boundary;

b) In relation to cross-lease subdivision, the line as drawn on a survey plan which is used to indicate legally the extent of the area that is mutually exclusive for the use of each flat/unit in addition to the boundary of the parent site;

c) In relation to unit title subdivision, the boundary of the accessory unit associated with a principal unit, in addition to the boundary of the parent site;

d) In relation to a zone boundary, the limit of a zone as shown on the Plan Maps (Part B).

building

a) Has the same meaning as defined in the Building Act 2004,

b) For the purpose of the Plan a building, as defined in subsection (a), shall exclude:

   i) Any building less than 10m² in area on the horizontal plane; and less than 2 metres in height. For the avoidance of doubt this exclusion does not apply to a building that is less than 10m² in area with a height of 2m or more nor does it apply to a building that is 10m² or greater in area and less than 2 metres in height;

   ii) Swimming pools and/or uncovered decks less than 1 metre in height regardless of their dimensions on the horizontal plane.

building component

A component of a building that is integral to and compliments its function including, but not limited to eaves, chimneys, balustrades and solar panels.

building improvement centres

Means premises used for the storage, display and sale of goods and materials used in the construction, repair, alteration and renovation of buildings and includes builders supply and plumbing supply centres and home and building display centres, garden centres and outdoor nurseries.
building platform
That portion of a new allotment or a site that are identified on a survey plan, approved building consent or resource consent upon which a building or parts of a building is to be constructed.

bulky goods retailing
Means retailing within the Bulky Goods Commercial Plan Area in the Tauriko Industry Zone where the activity is devoted to retailing of: large appliances, furniture, timber, hardware and building supplies, floor and window coverings, kitchen and bathroom fixtures, outdoor products, garden centres, automotive parts; and does not include food, clothing, footwear or personal effects goods, unless incidental to the retailing of bulky goods.

business activity
Land, buildings and structures used for:

- Retail activities;
- Professional and service activities;
- Social, and administrative activities;
- Educational activities;
- Technological activities;
- Tourism services activities;
- Services, storage, distribution or manufacturing activities; carried out on a site principally for commercial gain.

For the purpose of this definition, business activity does not include visitor accommodation or homestays.

Note: This definition addresses a collection of activities and some of these are covered by terms that are defined elsewhere in the Plan.

business activity (in relation to Chapter 11 – Financial Contributions)
For the purpose of Chapter 11 – Financial Contributions means the use of land and buildings for business purposes in accordance with the provisions of the Plan or resource consent. It also includes the use of land and buildings for visitor accommodation purposes, or for purposes that are not principally for commercial gain but provide employment (this includes, but is not limited to, schools and other educational facilities, public hospitals, police and fire stations and not-for-profit or voluntary organisations).

cabinet
A box-shaped structure which houses radio and telecommunication equipment, electrical equipment, equipment associated with the continued operation of network utilities and includes single transformers and associated switching gear distributing electricity at a voltage up to, and including 110kV.

camping grounds
Any area of land used for the purposes of placing or erecting temporary living-places for occupation by 2 or more families or parties (whether consisting of 1 or more persons) living independently of each other, whether or not such families or parties enjoy the use in common of entrances, water-supplies, cookhouses, sanitary fixtures, or other premises and equipment, and includes the following:

The erection, construction, operation, maintenance and enhancement of the following activities:

- Tent and powered sites for campers and caravans;
- Kitset awnings and mobile annexes;
- Kitchen, Lounge and Dining buildings;
- Laundry buildings;
- Ablution blocks and changing rooms;
- Managers accommodation;
- Holiday units;
- Carparking and internal vehicle and accessways;
- Associated campground and holiday park furniture including playground and play equipment, seating, picnic tables, barbecues and shade-sails;
- Administration buildings.
chartered professional engineer (CPE)
A person who meets the requirements listed in the Chartered Professional Engineers of New Zealand Act 2002 or any superseding legislation. The Chartered Professional Engineer (CPE) shall be experienced in the analysis and design of structures and shall have experience in designing modular-type structures.

childcare
The supervision of children for financial gain, not meeting the definition of home based childcare.

the City
For the purposes of the Plan, the area within the jurisdiction of the Council under the provisions of the Local Government Act (2002).

city-wide infrastructure
The bulk services (network infrastructure), reserve land or community infrastructure provided for the development of the City as a whole, either as additional assets or by increasing the capacity of existing assets required as a result of demand from growth-related development, and which are not specifically provided by a development as part of local infrastructure. City-wide infrastructure may include projects that individually do not provide for growth across the whole City, but as a network do provide for growth across the whole city in circumstances where Council has adopted this approach.

city-wide infrastructure contribution
A financial contribution for city-wide infrastructure paid as a condition of a resource consent or permitted activity in accordance with Chapter 11 - Financial Contributions.

cleanfill
Natural material such as clay, soil and rock and other inert material such as concrete or brick that are free of:
   a) combustible or putrescent components (including green waste) apart from by 10% per volume untreated timber in each load;
   b) hazardous substances or materials (such as municipal waste) likely to create leachate by means of biological or chemical breakdown; and
   c) any products or material derived from hazardous waste treatment, stabilisation or disposal processes.

clearance of indigenous vegetation/clearance of exotic vegetation
Means the removal, clearance, destruction, and crushing of all forms of indigenous vegetation/exotic vegetation and scrub, tree, and groundcover indigenous vegetation/exotic vegetation.

clubrooms
Means buildings which are set aside for the use, convenience and enjoyment of recreational or community organisations and includes the use of the building for entertainment, recreation or leisure, whether licensed or unlicensed.

coastal beach environment
The sand dunes, coastal vegetation and beaches along Pilot Bay, Mount Maunganui and the Papamoa Open Coast and includes properties:
   a) Adjoining the Mall;
   b) Adjoining Marine Parade;
   c) Seaward of Oceanbeach Road, Sunbrae Grove, Maranui Street (east of Sunbrae Grove) and Papamoa Beach Road.

coastal environment
Includes the coastal marine area (harbour and open coast), the land margins of the coastal marine area, the water, plants, animals, and the atmosphere above it; and all tidal waters and foreshore whether above or below mean high water springs, dunes, beaches, areas of coastal vegetation and coastal associated animals, areas subject to coastal erosion or flooding, salt marshes, sea cliffs and coastal wetlands, including estuaries.

coastal hazard erosion plan area (CHEPA)
The land that comprises the Current Erosion Risk Zone (CERZ), the 50 year Erosion Risk Zone (50 year ERZ) and the 100 year Erosion Risk Zone (100 year ERZ), being that area located between mean high water springs (MWHS) and the landward extent of the 100-year ERZ boundary between Mauao and the western boundary of Te Tumu Kaituna 14 Block identified on Plan Maps (Part B).
coastal marine area (CMA)

<table>
<thead>
<tr>
<th>Has the same meaning as contained in the Resource Management Act 1991 which means the foreshore, seabed, and coastal water, and the air space above the water –</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Of which the seaward boundary is the outer limits of the territorial sea;</td>
</tr>
<tr>
<td>b) Of which the landward boundary is the line of mean high water springs, except that where that line crosses a river, the landward boundary at that point shall be whichever is the lesser of:</td>
</tr>
<tr>
<td>i) One kilometre upstream from the mouth of the river; or</td>
</tr>
<tr>
<td>ii) The point upstream that is calculated by multiplying the width of the river mouth by 5.</td>
</tr>
</tbody>
</table>

Note: The boundary of the coastal marine area (CMA) in relation to rivers is defined in relation to river mouths. In the Bay of Plenty Region, the river mouths have been defined by agreement between the Minister of Conservation, Bay of Plenty Regional Council, and the appropriate City and District Councils, in accordance with section 2(1) of the RMA.

coastal processes engineer

A person who is a Chartered Professional Engineer who possesses expertise and qualifications in coastal geomorphology processes or coastal science. The Coastal Processes Engineer is required to be knowledgeable of the relevant coastal processes and hazards affecting the coastline to evaluate the impact of the coastal processes on any proposed development, including potential climate change effects.

coastal protection plan area

The area that encompasses the undeveloped open coastline of Papamoa East (the western boundary of Te Tumu Kaituna 14 Block to the Kaituna River mouth) that is likely to be at risk from coastal erosion or inundation within 100 years. The hazard line adopted for this area is 74 metres from the toe of the foredune.

commercial centres

The consolidation of retail and other business development within a network of these business areas that includes the following components:

a) City Centre – the area of the City forming the principal business, civic, cultural and entertainment centre of both the City and Western Bay of Plenty sub-region;

b) Sub-Regional Centres – consolidation of comparatively large total floorspace servicing a sub-regional population and providing multi-purpose, mixed retail, business, employment and entertainment opportunities;

c) Town Centres – consolidated areas providing a wide range of business opportunities including convenience retail, comparison shopping, entertainment, civic and cultural uses, and located to service a significant local population and generally provide pedestrian orientated main street development;

d) Large Format Centres – mixed commercial business areas that service population principally by travel from motor vehicle and are characterized by large floorspace retail tenancies. For the purpose of the Plan these large format centres are comparatively smaller than a sub-regional centre;

e) Neighbourhood Centres – areas providing opportunities for business, civic, cultural and entertainment uses to service a local neighbourhood;

f) Local Centres – areas providing a comparatively small cluster of convenience retail and other business opportunities to service a local community.

commercial zones

The Commercial Zone, Wairakei Neighbourhood Centre Zone, Wairakei Town Centre Zone (Core and Fringe), Tauriko Commercial Zone, and City Centre Zone.
**community facilities**
Means land, **buildings** and **structures**:

a) utilised for **activities** such as community use, deliberation, entertainment, recreation or leisure undertaken for purposes other than principally for commercial gain; or

b) operated by the **Council** as publicly funded (partially or wholly), run or owned **activities**.

**Community facilities** includes:

a) Citizens advice bureaus;

b) Council administration **offices**;

c) Libraries, museums and art galleries;

d) Legal aid **offices**;

e) Plunket rooms and rooms where information, counselling advice or similar assistance conducive to welfare is provided;

f) Public **recreational facilities and activities/minor public recreational facilities and activities**;

g) **Clubrooms**;

h) Community halls, community centres, community services, community theatres, community meeting rooms and community support centres (including those owned and managed by Council Controlled Organisations);

i) Societal lodges;

j) Public swimming pools (including those managed as Council Controlled Organisations);

k) **Places of worship**;

l) Ancillary fund-raising **activities to community facilities**, provided they are temporary.

**community garden**
An area of land cultivated collectively by a group of people for **primary production**, and not for commercial gain.

**community infrastructure**
Has the same meaning as defined in section 197 of the Local Government Act 2002.

**community organisations**
Is for the purpose of **Chapter 11 – Financial Contributions** and means the use of land or **buildings** for **activities** where people congregate on an organised basis for community **activities** such as recreation, worship or culture. This is limited to religious facilities, not-for-profit sports and social clubs, marae, museums, art galleries, libraries, community centres and community halls.

**comprehensive development consent (Wairakei Urban Growth Area)**
Means a resource consent for development and **buildings** for specific land use **activities** and **subdivision** within the Wairakei **Urban Growth Area** and any variation of that consent required where a proposed development is not covered by an existing consent.

**comprehensive stormwater consent**
Means a consent issued by Bay of Plenty Regional Council for a defined catchment that authorises a territorial authority to manage most stormwater related **activities** including capital works and discharges subject to consent conditions and an approved catchment management plan.

**comprehensively designed development (City Living Zone)**
Comprehensively planned and designed land use development of a **site** where the land use consent and **subdivision** consent are either submitted concurrently or the **subdivision** consent follows and implements the land use consent, and where all the design elements required to be considered in **subdivision** and land use rules of the **Plan** are considered in a comprehensive manner.
comprehensively designed development (Suburban Residential Zone - urban growth areas and Papamoa Medium Rise Plan Area)

For the purpose of development in the urban growth areas of Pyes Pa West, Hastings Road, Kennedy Road and North West Bethlehem identified in the Section 6 (Plan Maps, Part B) (Urban Growth Plans) and in the Papamoa Medium Rise Plan Area means the development of sites identified in the initial subdivision of the site and surrounds for comparatively higher density where the development of more than one dwelling is planned, designed and then assessed through land use consent process or an Outline Development Plan. In such circumstances land and subdivision consent are either submitted concurrently or the subdivision consent may follow and reflect the land use consent providing for all the design elements required to be considered in the subdivision and land use rules of the Plan to be considered in a comprehensive manner.

comprehensively designed development (Suburban Residential Zone - outside of urban growth areas)

For the purposes of development outside of the urban growth areas means the development of land for comparatively higher residential density where the development of more than one dwelling is planned, designed and then assessed through the land use consent or subdivision process with all the design elements required to be considered in the subdivision and land uses rules of the Plan considered in a comprehensive manner.

comprehensively designed development in the Wairakei Residential Zone Medium Rise Plan Area

For the purpose of development within the Wairakei Urban Growth Area means development of land for comparatively higher residential density where the development of more than one dwelling is planned, designed and then assessed through the land use consent and subdivision consent concurrently or the subdivision consent follows and implements the land use consent, where all the design elements required to be considered in subdivision and land use rules are considered in a comprehensive manner.

consent notice

construction

Any work in connection with the construction, installation, carrying out, repair, cleaning, painting, renewal, alteration, dismantling or demolition of:

  a) Any building, structure, wall, fence or chimney, whether constructed wholly or partly above or below ground;

  b) Any road, motorway, harbour or foreshore works, railway, cableway, tramway, canal, or aerodrome;

  c) Any drainage, irrigation, or river control work;

  d) Any bridge, viaduct, dam, reservoir, earthworks, pipeline, aqueduct, culvert, drive, shaft, tunnel or reclamation;

  e) Any scaffolding or falsework.

contaminated land

Has the same meaning as in the Resource Management Act 1991 which means land that has a hazardous substance in or on it that:

  a) Has significant adverse effects on the environment; or

  b) Is reasonably likely to have significant adverse effects on the environment.

For sites on the Bay of Plenty Regional Council’s Selected Land Use Register, limited to that part of a site(s) that is identified as being contaminated and is registered as: Contamination Confirmed;

Contaminated land does not include land identified on the Bay of Plenty Regional Council’s Selected Land Use Register as:

  i) Contamination Managed or Contamination Acceptable/Remediated, unless the contamination levels are not acceptable for the proposed land use; and/or where the development is proposed that may compromise the integrity of any methods or procedures to control access and contact to the contaminant;

  ii) Verified Site History;

  iii) Unverified Site History;

  iv) No Identified Contamination;

  v) Entered into Database in Error.

coolstore

Means a refrigerated storeroom for perishable horticultural produce.
Council
The Tauranga City Council.

**damage (in relation to Notable or Heritage Trees)**
Means:

a) Topping;
b) Pollarding;
c) Drilling holes into a tree; or
d) Removing bark from a tree.

**daytime**
That period between 0700 hours (7am) and 2200 hours (10pm).

**demolition**
Means dismantling, destruction and/or removal of part or all of any building or structure.

**design feature**
A distinctive part of a building designed for visual effect that is not integral to the day to day functioning of that building.

**developed landscape area**
Means a combination including trees, shrubs, groundcover and growing areas, hard landscape elements (including but not limited to permeable paved surfaces, artworks, fences or seating) which provide amenity to the streetscape.

**direct vehicle access**
The position of a carport, garage, or vehicle parking space in relation to the Road Zone so that entry and exit to that space is situated more or less perpendicular to the Road Zone from which it is served.
**drip-line**
The point at which a vertical line from the outermost extent of a tree’s spreading canopy branches meets the ground, or for a tree with a columnar canopy, a distance outward from the trunk of half the height of the tree.

**dwelling unit**
Is for the purpose of Chapter 11 – Financial Contributions and means a building or part of a building intended to be used as an independent residence, including, but not limited to, apartments, semi-detached or detached houses, units, town houses and caravans (where used as a place of residence or occupied for a period of time exceeding 3 months in a calendar year). To avoid doubt, visitor accommodation units that are separate unit titles will be considered as dwelling units. For the purposes of this definition the following activities will not be assessed as a dwelling unit:

a) Caravans and other mobile forms of accommodation located and serviced within an approved camping ground (i.e., one that has received a resource consent or has existing use rights under section 10 of the RMA);

b) Premises or parts thereof complying with the visitor accommodation provisions of the Plan, up to and including 30 September 2000, or with resource consent to operate as visitor accommodation in which each unit is not separately unit titled.

**dwelling unit equivalent**
The number of occupants the building is designed or licensed to accommodate divided by 2.5 persons.

**earthworks**
Means the removal, relocation or deposit of soil or cleanfill within, onto or from land and includes archaeological investigations authorised by Heritage New Zealand, grave digging or domestic gardening.

**ecological restoration**
Returning a place as nearly as possible to a known earlier state by reassembly, reinstatement and/or removal of extraneous additions, and includes ground reinstatement.

**ecosystem**
Shall have the same meaning as contained within the Environment Act 1986 which means any system of interacting terrestrial or aquatic organisms within their natural and physical environment.
**edge of a bank**
The topographical feature defined in the diagram below:

![Diagram of edge of a bank](image)

**electric line**
All conductors, support structures and associated electrical fittings (including fittings supporting, or connected to, those conductors), whether above or below ground, that are used, or intended to be used, in, or in connection with, the supply of electricity from the outgoing terminals of a generating station, a building, enclosure, or other structure to:

a) Incoming terminals of any other building, enclosure, or other structure;
b) An electrical appliance, in any case where the electrical appliance is supplied with electricity other than from a terminal in a building, enclosure, or other structure.

**emergency event**
An unexpected natural or man-made catastrophe causing significant physical damage or destruction, or imminent threat of physical damage or destruction.

**emergency removal**
The removal of a notable tree or heritage tree where that tree:

a) Poses an existing or imminent threat to life or property;
b) Poses an existing or imminent threat to an existing network utility;
c) Carries a fatal disease.

**emergency services**
Land and buildings on a site owned or leased by agencies assisting the public in times of emergency, including the New Zealand Fire Service or an equivalent emergency fire service, the New Zealand Police Service and Saint Johns Ambulance Service, and is principally for the purposes of administration, vehicle and equipment storage and maintenance, and training related to the services provided.
environment

Has the same meaning as contained within the Resource Management Act 1991, which includes:

a) Ecosystems and their constituent parts, including people and communities; and
b) All natural and physical resources; and
c) Amenity values; and
d) The social, economic, aesthetic, and cultural conditions which affect the matters stated in paragraphs a) to c) of this definition or which are affected by those matters.

esplanade reserve

Has the same meaning as contained in the Resource Management Act 1991 which means a reserve within the meaning of the Reserves Act 1977:

a) Which is either:
   i) A local purpose reserve within the meaning of section 23 of that Act, if vested in the territorial authority under section 239 of the RMA; or
   ii) A reserve vested in the Crown or a regional council under section 237D of the RMA; and
b) Which is vested in the territorial authority, regional council, or the Crown for a purpose or purposes set out in section 229 of the RMA (conservation values, public access or recreational use).

esplanade strip

Has the same meaning as contained in the Resource Management Act 1991 which means a strip of land created by the registration of an instrument in accordance with section 232 of the RMA for a purpose or purposes set out in section 229 of the RMA (conservation values, public access or recreational use).

exempted party

Persons or organisations either exempt from the provisions of the Local Government Act 2002 under section 8 of that Act, or which hold a valid resource consent issued before 1 July 2004 and which is subject to a requirement for a financial contribution in circumstances where the payment of financial contributions pursuant to that consent are outstanding.

factory farming

A farm or unit of primary production in which the process is carried out largely indoors or in a restricted outdoor space and which is not dependent on the soil characteristics of the site. It includes (but is not limited to) poultry farms, rabbit farms, fitch farms, mushroom farms, and intensive feedlots for free-range commercial livestock such as deer or cattle, but excluding pigs. It does not include other indoor horticultural activities such as greenhouses.

financial contribution

Has the same meaning as in Section 108(9) of the Resource Management Act 1991 which means a contribution of:

a) Money; or
b) Land, including an esplanade reserve or esplanade strip (other than in relation to a subdivision consent), but excluding Maori land within the meaning of the Te Ture Whenua Maori Act 1993 unless that Act provides otherwise; or
c) A combination of money and land.

flood hazard plan area (FHPA)

The area of land that is both identified as within the Flood Hazard Plan Area (FHPA) and is less than 2.5-2.9 metres above Moturiki Datum. For clarity, this area excludes any building platform, greater than 2.5-2.9 metres above Moturiki Datum in the relevant area identified in the Plan Maps (Part B).
**forestry**
The commercial production of trees for wood products, including farm and wood lots.

**freestanding sign**
A sign fixed permanently to a site, independent of any other building or structure on the site. To avoid doubt, freestanding signs do not include sandwich signs or other signs not fixed permanently to the site.

**full time equivalent (FTE)**
The number of full-time and part-time employees in a business that represents these workers as a comparable number of full-time employees (defined as total hours worked during a standard working week divided by average annual hours worked in full-time jobs). For example a business that operates 40 hours per week and employees 10 full time employees would have 10 FTE. If that business had 10 employees, 5 at 40 hrs/week, and 5 at 20 hrs/week that equates to 7.5 FTE.

**garden centre**
Premises used for the sale of plants and associated merchandise or advisory services, including premises for the propagation, display or storage of plants for sale to the public.

**general retail**
Means any activity where 26% or more of the activity floorspace is devoted to retailing, storage and display for trading direct to the public.

**greenfield subdivision/development**
New subdivision or development for residential or other urban land uses, from areas that were formerly undeveloped rural or open land.

**gross developable area (Wairakei urban growth area)**
Means a development yield area of independent dwelling units in the Wairakei Urban Growth Area which includes the provision of road and reserve requirements. It includes land used for;

- a) Residential purposes, including all open space and on-site parking associated with a dwelling(s);
- b) Local roads and roading corridors, including pedestrian and cycleways (and excluding state highways and major arterial routes (as determined by the roading hierarchy map);
- c) Local (neighbourhood) reserves;
- d) Gross developable area excludes land that is:
  - i) Stormwater ponds and detention areas;
  - ii) Geotechnically constrained (such as land subject to subsidence or inundation);
  - iii) Set aside to protect significant ecological, cultural, heritage or landscape values;
  - iv) Set aside for esplanade reserves or access strips that form part of a larger regional or sub-regional network;
  - v) Identified for commercial or business use, or for schools, hospitals or other district, regional or sub-regional facilities.

**gross floor area (GFA)**
Means the sum of the floor area or area of floors of a building or buildings measured from the exterior walls, or from the centrel ine of walls separating two buildings including mezzanine floors and internal balconies, but excluding space occupied by internal walls, stairwells, external balconies and terraces, rooftop parking areas, machinery rooms, lift shafts; and refuse areas. For the purposes of assessment specified by Appendix 4A: General Minimum On-site Parking and Loading Requirements it shall also exclude other internal car parking, and vehicle manoeuvring, loading and unloading spaces.

**gross floor area (GFA)**
For the purpose of Chapter 11 – Financial Contributions means the sum of the floor area or floors of a building or buildings measured from the external walls, or from the centrel ine of walls separating two buildings, including mezzanine floors and internal balconies.
**gross leaseable floor area (GLFA)**
The sum of any floor area designed for occupancy and exclusive use by a freehold owner or a tenant (including both freehold and leased areas). Exclusions include, but are not limited to:

a) Lift shafts and stairwells, including landing areas;
b) Corridors and malls where not for the exclusive use of a single tenancy;
c) Any parking area required by the Plan;
d) Machinery rooms for lift machinery, generators or air-conditioning equipment;
e) Vehicular loading and unloading areas;
f) Seating areas;
g) Amenities such as toilet areas;
h) Management offices for shopping centres and supermarkets (including any training room or offices used by staff).

**ground level**
The level of ground existing when approved earthworks associated with the most recent subdivision of the land have been completed (as at the issue of the section 224 Certificate or the previous legislative equivalent).
Areas of cut or fill which have resulted or will result from work undertaken as part of the construction of a building or an activity shall not be used in calculation of ground level.
When the ground level as defined, is not able to be identified, ground level shall mean the existing ground level but excluding any areas of cut or fill which have resulted or will result from work undertaken as part of the construction of a building or an activity which did/does not include subdivision.

**habitable room**
Any room or rooms in any residential building(s), visitor accommodation or homestay but excludes any kitchen, laundry, bathroom, water closet, any rooms used solely as an entrance hall, passageway, stairway or garage, or room of a specialised nature occupied neither frequently nor for extended periods.

**hapu**
For the purposes of the Plan a Maori sub-tribe or clan usually comprising a number of whanau (families) linked through a common ancestor.

**hard protection works**
Any manmade building or structure that has the function of protecting a building, structure or land from inundation or erosion by the sea.

**hazardous substance**
Any substance which may impair human, plant, or animal health or may adversely affect the health or safety of any person or the environment, and whether or not contained in or forming part of any other substance or thing and:

a) Includes substances prescribed by regulations of relevant legislation;
b) Does not include substances prescribed by regulations associated with relevant legislation as not being hazardous substances.

**hazardous substance facility**
Activities involving hazardous substances, including vehicles for their transport, and sites at which these substances are stored, used, handled and disposed of. Hazardous substance facility does not include vehicles or applicators being used to apply diluted agrichemical substances in a manner consistent with their intended use, or the incidental use and storage of hazardous substances in minimal domestic quantities for domestic use or retail sale.

**health centre**
Land and buildings used for the purposes of human or animal health care (including treatment) diagnosis, consultation and laboratories to assist in this process.

**heavy machinery**
A fixed or portable mechanical device with a tare weight of more than 3.5 tonnes, and includes a motor vehicle (other than a motorcar that is not used, kept, or available for the carriage of passengers for hire or reward) having a gross laden weight exceeding 3,500kg.
**height**
In relation to any buildings and unless provided for in any other part of the Plan, means the vertical distance between the ground level at any point and the highest part of the building immediately above that point, measured at the external envelope of the building.

Note: The height of a building or structure excludes the permitted intrusions outlined at in Rule 4H.2.3 – Permitted Height and Viewshaft Protection Area Intrusions and Rule 4H.2.4 – Permitted Activities – Permitted Intrusions for Radio Configuration in the Residential and Rural Residential Zone of the Plan. Where a building is within 0.2 metres of the maximum permitted building height certification from a licensed surveyor may be required to establish compliance with the maximum permitted building height.

**heritage tree**
Means a tree listed in Appendix: 7C Register of Heritage Trees which forms part of the historic heritage of the City.

**high density**
For the purpose of residential density means residential areas characterised by predominantly multi-unit residential developments including attached units, town houses and apartment buildings with a density of dwellings greater than 1 independent dwelling unit per 200m² of gross site area.

**high-voltage transmission network**
The network of transmission electric lines and associated support structures owned and operated by Transpower New Zealand Limited operating at or above 66kV.

**historic heritage**
<table>
<thead>
<tr>
<th>Has the same meaning as in the Resource Management Act 1991 which:</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Means those natural and physical resources that contribute to an understanding and appreciation of New Zealand's history and cultures, deriving from any of the following qualities:</td>
</tr>
<tr>
<td>i) archaeological;</td>
</tr>
<tr>
<td>ii) architectural;</td>
</tr>
<tr>
<td>iii) cultural;</td>
</tr>
<tr>
<td>iv) historic;</td>
</tr>
<tr>
<td>v) scientific;</td>
</tr>
<tr>
<td>vi) technological;</td>
</tr>
<tr>
<td>b) Includes—</td>
</tr>
<tr>
<td>i) historic sites, structures, places, and areas;</td>
</tr>
<tr>
<td>ii) archaeological sites;</td>
</tr>
<tr>
<td>iii) sites of significance to Maori, including wahi tapu;</td>
</tr>
<tr>
<td>iv) surroundings associated with the natural and physical resources.</td>
</tr>
</tbody>
</table>

**home-based business**
An occupation, craft, business or activity that is clearly incidental to the permitted residential use of a site and is conducted on a continuous or repetitive basis for commercial gain, and includes premises used for the purpose of home based childcare. For the avoidance of doubt a sign shall not be considered a home-based business in its own right.

**home based childcare**
The supervision within an independent dwelling unit of not more than three children additional to the children under the primary care of the occupant of that dwelling, for the purpose of financial gain.

**homestay**
A portion of an independent dwelling unit (excluding a secondary independent dwelling unit) occupied on a temporary (periods of up to 3 months continuous occupation during any 12 month period) basis and includes bed and breakfast establishments.
hotspot
Areas of high concentrations of contaminants such as sheep and cattle dips, spray pads or sheds, spray equipment wash down areas, bulk fuel storage, uncontrolled dumping of chemical containers, glasshouses, bio-solid sites, farm dumps, sumps, implement and fertiliser sheds and offal pits.

household unit
Means a building or group of buildings occupied exclusively as the home or residence of not more than one household.

hui
A meeting or gathering for any number of purposes, e.g. weddings, fundraising, galas, anniversaries, group discussion.

important amenity landscapes
Landscapes listed in Appendix 6B: Important Amenity Landscapes which are significant to the local community but which do not meet the criteria for Outstanding Natural Features and Landscapes, although they retain high amenity and landscape character values.

independent dwelling unit
A building or part of a building intended to be used as an independent residence, including apartments, semi-detached or detached houses, residential units and town houses for a family or up to 6 unrelated persons. For the purposes of this definition caravans and other mobile forms of accommodation shall not be assessed as an independent dwelling unit.

indigenous
Flora or fauna occurring in New Zealand as a consequence of natural processes and does not include any species introduced by human intervention.

industrial activity
Buildings or land used for the manufacture, dismantling, processing, assembly, treating, testing, servicing, maintenance, storage or repairing of goods, products, articles, materials or substances and includes premises on the same land used for:
  a) The selling of goods by wholesale;
  b) The provision of amenities for employees;
Which are incidental to any of those industrial operations.

Note: This definition addresses a collection of activities and some of these are covered by terms that are defined elsewhere in the Plan.

industrial zones
The Tauriko Industry Zone, the Industry Zone, Papamoa East Employment Zone and the Port Industry Zone.

infill subdivision/development
The further residential subdivision/development of land within the existing developed areas of the City.

infrastructure
The provision of, and resources associated with the delivery or reticulation of, water, roads, electricity, gas, wastewater disposal, stormwater disposal, reserves, streetlighting, community infrastructure, community facilities and telecommunications and includes activities which can be undertaken by a network utility operator defined under Section 166 of the Resource Management Act 1991.

infill subdivision/development
In relation to Chapter 12, Section 12G means:
Transport, stormwater, water and wastewater networks and systems or reserves (including the land required for these purposes) constructed as part of the subdivision process and any associated services connections that are intended to be transferred into the Council’s ownership to provide for the needs of people, communities and future generations.

infrastructure performance standards
The performance standards for delivery of infrastructure set out in Chapter 12 - Subdivision, Services and Infrastructure of the Plan.

integrated transport assessment
Means an assessment in accordance with the requirements of Appendix 4K: Integrated Transportation Assessment Requirements necessary to demonstrate the effects of, and methods to address the movement of people resulting from a particular subdivision, land use or development.
**intensification**
An increase in the density (of dwellings, population or employment) over the current density of a given area.

**iwi**
A Maori tribe, grouping of *hapu* or people associated with a certain geographical area and/or linked through a common ancestor.

**iwi authority**
The authority which represents an *iwi* and which is recognised by that *iwi* as having authority to do so.

**kaitiakitanga**
| Has the same meaning as contained in the Resource Management Act 1991 which means the exercise of guardianship by the tangata whenua of an area in accordance with tikanga Maori in relation to natural and physical resources; and includes the ethic of stewardship. |

$L_{10}$
Means the noise level that may be exceeded for 10% of the measurement period. $L_{10}$ is an indicator of the mean maximum noise level and is the descriptor for intrusive noise.

$L_{dn}$
Means the A-frequency-weighted day-night average sound level in decibels.

$L_{eq}$
Means the average continuous noise level measured as the time averaged sound level (on a log/energy basis) over the measurement period.

$L_{max}$
Means the maximum sound level recorded during the measurement period.

**landfill**
The use of land or a site for the activity of dumping of soil, cleanfill or any other material for the purpose of waste disposal.

**landscape character**
The combination of characteristics and elements that distinguish any particular area of land from another area. It is determined by the inter-relationship of:

- a) Landform - which reflects the topography, geology, hydrology and associated natural processes such as erosion, and weathering;
- b) Land cover - which includes drainage patterns, vegetation (including exotic and indigenous), natural waterways, wetlands, rivers and streams, and reflects the biological processes such as plant succession and soil formation;
- c) Human elements - which reflects the existing land use pattern and the cultural, social and heritage values that give added meaning to an area.

*Note: The characteristics and elements of Tauranga’s Suburban, Urban, Rural Residential and Rural areas have been described in the Boffa Miskell (2011) Tauranga City Landscape Study prepared for the Tauranga City Council.*

**landscape strip**
The planting of trees, shrubs, and ground cover along a property or site boundary for visual amenity and may also include the alteration of landform (such as bunding) or the erection of solid fencing for the purposes of screening.

**legal width**
The width of a vehicle access as defined by legal survey plan, memorandum or easement.

**light spill**
Light from both direct and indirect sources, which falls outside the area that is required to be artificially lit. Light spill is measured in lux (lumens per square metre), while light intensity is energy transferred by light measured in candelas per square metre. Measurement of both the horizontal and vertical components is required.

**local infrastructure**
Those bulk services (network infrastructure), reserve land or community infrastructure provided for the City’s urban growth areas, either as additional assets or by increasing the capacity of existing assets required as a result of demand from growth-related development. A local infrastructure project may provide for the development of multiple urban growth areas, although not for development across the whole city.
local infrastructure contribution
A financial contribution for local infrastructure paid as a condition of a resource consent or Permitted Activity in accordance with Chapter 11 Financial Contributions.

low demand business activity
Means the use of land and buildings for the purposes of storage, warehousing, distribution or the operation of utility networks in circumstances where Council is satisfied that the proposed activity will have a relatively minor impact on its water and wastewater network on a per m² gross floor area basis relative to the impact of an average business activity as measured on the same basis.

low density
For the purpose of residential density means areas characterised by predominantly detached homes at a maximum density of 1 independent dwelling unit per 325m² of nett site area.

main living area
A lounge, kitchen, dining room or family room identified by the applicant as the main living area of an independent dwelling unit.

mast
Any pole, tower or similar structure designed to carry aerials or antenna to facilitate telecommunications, radio communications and broadcasting and which is fixed to the ground (and not on a building or structure).

mean high water springs (MHWS)
The average line of spring high tide. MHWS is indicatively shown as the seaward boundary of the Plan Maps (Part B) and established generally as 1.0 metre above Moturiki Datum, augmented for practical purposes by natural and man made indicators such as the toe of cliffs, dunes and seawalls.

Note: MHWS is shown indicatively on the Plan Maps (Part B) as a best estimate at the time of decisions issued on the Plan. Due to the dynamic nature of coastal processes the actual location of MHWS may change through time. Where a greater degree of accuracy is required the location of MHWS should be confirmed by survey.

medium density
For the purpose of residential density means areas characterised by a mix of housing types including attached units, town houses and apartment buildings with a maximum density of 1 independent dwelling unit per 200m² of gross site area.

mineral exploration
Has the same meaning as 'exploration' within the Crown Minerals Act 1991, which means any activity undertaken for the purpose of identifying mineral deposits or occurrences and evaluating the feasibility of mining particular deposits or occurrences of one or more minerals; and includes any drilling, dredging, or excavations (whether surface or sub-surface) that are reasonably necessary to determine the nature and size of a mineral deposit or occurrence.

mineral prospecting
Has the same meaning as 'prospecting' within the Crown Minerals Act 1991, which means any activity undertaken for the purpose of identifying land likely to contain exploitable mineral deposits or occurrences; and includes:
   a) Geological, geochemical, and geophysical surveys;
   b) The taking of samples by hand or hand held methods;
   c) Aerial surveys.

mining
Has the same meaning as contained in the Crown Minerals Act 1991 which means to take, win, or extract, by whatever means, a mineral existing in its natural state in land, or a chemical substance from that mineral, for the purpose of obtaining the mineral or chemical substance; but does not include prospecting or exploration; and to mine has a corresponding meaning.
For the purpose of this City Plan, the mining activity includes the on-site processing of materials.

**minor pruning**

Relates to any tree listed as a notable tree or heritage tree or a tree in a significant group of trees in the Plan and shall be deemed to be:

a) The removal of broken branches, deadwood or diseased vegetation;

b) The trimming and pruning of vegetation necessary to protect electrical lines required to meet the Electricity (Hazards from Trees) Regulations 2003;

c) Removal of branches physically interfering with existing buildings or pedestrian and vehicle accessways, where such work is carried out in accordance with advice from a qualified arborist;

d) The trimming and pruning of roots required as part of public pedestrian and vehicular remediation, where such work is carried out in accordance with advice from a qualified arborist; or

e) Any pruning able to be carried out through the use of hand held secateurs only;

f) Removal of branches no greater than 100mm in diameter for crown lifting purposes up to a maximum height of 2.4 metres above ground level where such work is carried out in accordance with advice from a qualified arborist.

**minor public recreational facilities and activities**

Means:

a) Tree husbandry including replacement, removal/control of indigenous, exotic, noxious or nuisance plant species including weed control, tree and vegetation planting (including revegetation);

b) Pedestrian and cycle track construction including pathways, bridging, boardwalks, walkways and steps;

c) Animal control operations;

d) Interpretive and directional signs;

e) Park furniture including bollards, playgrounds and play equipment, gates, stiles, seating, memorials, picnic tables, barbeques, sculptures, artworks and interpretative and directional signs, shade-sails and viewing platforms;

f) Public toilets, changing rooms, shelters and free standing showers;

g) Public carparks and access roads;

h) Gardens, landscaped and grassed areas;

i) Beach grooming and cleaning operations;

j) General maintenance of reserves and public open space areas.

for the use and enjoyment of the public.

**minor structures and activities**

In relation to the Coastal Hazard Erosion Plan Area, Special Ecological Areas, Open Space Zones, setbacks from the Coastal Marine Area, permanently flowing river or stream or wetland, and the High Voltage Transmission Plan Area means:

a) Gardens, trees, paving areas and landscaped areas;

b) Garden structures (including but not limited to fences, steps, pergolas, shade sails, barbeque areas, clotheslines, letterboxes);

c) Decks less than 1m in height and 30m² in area;

d) Structures and buildings less than 10m² in gross floor area (GFA) and do not require a building consent.

**minor structures and activities**

In relation to the Flood Hazard Plan Area means:

a) Paved and landscaped areas;

b) Garden structures (including but not limited to fences, steps, pergolas, shade sails, barbeque areas, clotheslines, letterboxes);

c) Decks less than 1m in height and 30m² in area;

d) Unenclosed carports;

e) Structures and buildings less than 10m² in gross floor area (GFA) and do not require a building consent;

f) Cantilevered decks and verandahs, including support poles for decks and verandahs.
minor structures and activities
In relation to the significant archaeological areas means:
   a) Gardening activities
   b) Garden structures (including fences, steps, pergolas, paved areas, clothes lines or letter boxes);
   c) Support poles for decks;
   d) Tree planting;
   e) Interpretive and directional signage;
   f) Pedestrian and cycle tracks including pathways, boardwalks and steps;
   g) Park furniture including bollards, lighting poles, rubbish bins, playgrounds and play equipment, gates, stiles, seating, memorials, picnic tables, barbeques, sculptures, artworks or shade-sails.

minor structures and activities
In relation to Significant Maori Areas means:
   a) Gardening activities
   b) Garden structures (including fences, steps, pergolas, paved areas, clothes lines or letter boxes); cumulatively involving cuts less than 1.5 metres in height,
   c) Tree planting;
   d) Interpretive and directional signage.

minor upgrading (in relation to electric lines)
An increase in the carrying capacity, efficiency or security of electric lines (including transmission electric lines) utilising the existing support structures or structures of a similar scale, intensity and character, and includes:
   a) The addition of circuits and conductors;
   b) The reconducting of the line with higher capacity conductors;
   c) The resagging of conductors;
   d) The bonding of conductors;
   e) The addition of longer or more efficient insulators;
   f) The addition of earthing wires which may contain telecommunication lines, earthpeaks and lightning rods;
   g) The addition of electrical fittings;
   h) Support structure replacement within the same location as the support structure that is to be replaced, including tower replacement within the existing alignment of the transmission line corridor as defined by Rule 10A.6.1 – Minor Upgrading of Above-Ground Electric Lines and Support Structures or pole replacement in adjacent footings;
   i) The replacement of existing cross-arms with cross-arms of an alternative design;
   j) An increase in support structure height required to comply with the New Zealand Electrical Code of Practice 34:2001 by not more than 15% of the base height of the support structure, and where the base height is defined as the height of the structure at date of public notification of the Plan;
   k) The increase in voltage of electric lines from 11kV to 33kV.
Minor upgrading shall not include an increase in the voltage of a high voltage transmission line unless the line was originally constructed at the high voltage but has been operating at a reduced voltage.

minor vegetation clearance
Means:
   a) the disturbance or clearance of indigenous vegetation/clearance of exotic vegetation amongst grazing pasture/horticultural crops to enable the continuation of primary production activities established at 17 October 2009;
   b) the clearance or disturbance of an agricultural or horticultural crop (including grazing pasture);
   c) the routine maintenance, including pruning of indigenous vegetation/exotic vegetation, to maintain the use of existing public and private roads, minor public recreational facilities and activities and the operation and maintenance of existing infrastructure and public amenities;
   d) the removal or disturbance of plant pest species (as listed in the Regional Pest Management Plan), including weed control;
   e) the disturbance or clearance of indigenous vegetation/clearance of exotic vegetation which was planted for harvesting.
mixed use
A single comprehensive development incorporating both residential and business activities.

moturiki datum
The orthometric datum commonly used in this region. It is based upon mean sea level as established by the Lands and Survey department. All Council and Land Information New Zealand Benchmarks for the City are based on this datum. All reduced level (RL) and contour lines required under the Plan must be related to this datum. Mean Sea Level is a fixed datum, as opposed to the Mean Level of Sea which may vary due to environmental processes.

multiple-owned Maori land
Land held in multiple ownership under the Te Ture Whenua Maori Act 1993.

multi-unit residential development
Is for the purpose of Chapter 11 – Financial Contributions and means one or more dwelling units on a site over and above any existing dwelling unit, and includes two or more comprehensively planned and designed residential dwelling units, other residential activities or visitor accommodation units.

natural character
The qualities of the environment that give the City recognisable character. These qualities may be ecological, physical (including landscape), spiritual, cultural or aesthetic in nature. They include modified and managed environments.

natural hazard
Has the same meaning as contained in the Resource Management Act 1991 (RMA), and means any atmospheric or earth or water related occurrence (including earthquake, tsunami, erosion, volcanic and geothermal activity, landslip, subsidence, sedimentation, wind, drought, fire or flooding) the action of which adversely affects or may adversely affect human life, property, or other aspects of the environment.

neighbourhood reserve
Land that is primarily provided for use by local communities for casual recreation, play, relaxation, community activity, links to other areas or quiet open space. Neighbourhood reserves also provide visual contrast in the urban environment.

nett developable area
Means a given area of land for greenfield subdivision/development and includes land used for:

a) Residential activity purposes, including all open space and on-site parking associated with dwellings;

b) Local roads and roading corridors, including pedestrian and cycleways (and excluding expressways, motorways, strategic roads and arterial roads as defined in the road hierarchy);

c) Collector roads and roading corridors (as defined in the road hierarchy) where direct access from allotments is obtained. Where only one side of the collector road or roading corridor has direct access only 50% of the collector road or roading corridor shall be used for the purpose of this definition;

d) Neighbourhood reserves;

e) But excludes land that is:

i) Stormwater ponds and detention areas;

ii) Geotechnically constrained (such as land subject to subsidence or inundation);

iii) Set aside to protect significant ecological, cultural, heritage or landscape values;

iv) Set aside for non-local recreation, esplanade reserves or access strips that form part of a larger regional, sub-regional, or district network;

v) Identified or used for non-residential activities including business activities, schools, network utilities, health centres, or other district, regional or sub-regional facilities.
**nett site area**
The area of a *site* less any area of that *site* that is solely for the purpose of providing access to the *site* and for clarity also excludes:

a) An entrance strip owned in common with the owners of other *sites*;

b) Any area in a cross-lease, company lease or unit title *subdivision* that is not covered by an *independent dwelling unit*, the *accessory buildings* of that *independent dwelling unit*, or other area set aside for the exclusive use of the occupants of that *independent dwelling unit*.

**nett yield**
The number of *independent dwelling units* or residential allotments established within a given *nett developable area*.

**network infrastructure**
Has the same meaning as defined in section 197 of the Local Government Act 2002 varied to the extent that it includes land required for the specified purposes.

**network utility (network utilities)**
Any activity relating to:

a) Distribution or transmission by pipe line of natural or manufactured gas, petroleum or geothermal energy;

b) Telecommunication or radiocommunication;

c) Transformation, transmission, or distribution of electricity;

d) The holding, transmission and distribution of water, (whether treated or untreated) for supply, including irrigation;

e) Stormwater treatment (including *stormwater reserve*) drainage or sewerage reticulation systems;

f) *Construction*, operation and maintenance of railway lines, tramways and roads;

g) *Construction*, operation and maintenance of an airport as defined by the Airport Authorities Act 1966, including the provision of any approach control service within the meaning of the Civil Aviation Act 1990;

h) Lighthouse, navigation aids, beacons, signal stations and *natural hazard* emergency warning devices;

i) Meteorological services;

j) A project or work described as a ‘*network utility operation*’ by regulations made under the Resource Management Act 1991;

k) *Construction*, operation and maintenance of power generation schemes; and includes:

l) All *structures* necessary for the operation of the *network utility services*;

m) The operation and maintenance of the *network utility service*.

but excludes:

n) *Amateur radio configuration*

**ngati kahu kaumatua dwelling unit**
Means a dwelling unit of not more than 50m² *gross floor area* erected within the Ngati Kahu Papakainga Zone. The dwelling unit must contain no more than 3 *habitable rooms*.

**night-time**
That period between 2200 hours (10pm) and 0700 hours (7am).
**noise sensitive activities**
Means **buildings** or parts of **buildings** used for, or intended to be used for the following purposes:

a) Residential activity;
b) Visitor accommodation;
c) Schools and tertiary education premises;
d) Health centre.

**non-exempted party**
A person or organisation not meeting the definition of an **exempted party**.

**non-residential activity**
Any activity not defined as a **residential activity** or a **temporary activity** and may include any **business activity**, **industrial activity**, **home-based business activity**, **visitor accommodation** or **homestay**.

**notable tree**
Means a tree listed in **Appendix 6E: Notable Tree Register** which forms part of the landscape character of an area, or **the City** and scores 130 points (for native trees) or 150 points (for exotic trees) or more, when assessed against the **Standard Tree Evaluation Method (STEM)** criteria.

**notional boundary**
A line 20 metres from any side of any **dwelling** in **Rural Zones** or the legal **boundary** where this is closer than 20 metres.

**offensive trade**
Means the following **activities** or processes:

a) Blood or offal treating;
b) Bone boiling or crushing;
c) Dag crushing;
d) Fellmongering;
e) Fish cleaning and curing;
f) Flax pulping;
g) Flock manufacturing, or teasing of textile materials for any purpose;
h) Gut scraping and teasing;
i) Refuse disposal;
j) Storage, drying, or preserving of hides, bones, hoofs or skins;
k) Tallow melting;
l) Tanning;
m) Wood pulping;
n) Wool scouring.

**office**
The use of a **building** for the purposes of administration, consultation, or management of business transactions and shall include:

a) Administrative **offices** for the purposes of managing the affairs of an organisation, whether or not trading is conducted;
b) Commercial **offices** such as banks, insurance agents, or real estate agents where trade (other than for the immediate exchange of money for goods) is transacted;
c) Professional **offices** such as the **offices** of accountants, solicitors, architects, engineers, surveyors, stockbrokers, and consultants where a professional service is available and carried out. This definition shall not include those **activities** defined as **health centres**.

In this context ‘office’ shall exclude such **activities** which fall within the class of **activity** known as **home-based businesses**.

**office ancillary to a showhome**
Means a **building**, or part of a **building**, on the same **site** as a **showhome**, within which administrative **activities** relating to the continuing operation of that **showhome** are undertaken.

**one-bedroom dwelling**
A **dwelling unit** that has not more than two rooms, excluding a kitchen, laundry, bathroom, toilet or any room used solely as an entrance hall, passageway or garage. This includes studio apartments.
on-site services
Is for the purpose of Chapter 11 – Financial Contributions and means the services provided for a new subdivision or land use which are solely or principally for the benefit of land within the application site, and which will be vested as public assets in the territorial local authority.

open space zones
The Passive Open Space, Active Open Space, Active Open Space (Major) and Conservation Zones.

outdoor developed landscape
A combination of permeable surface and plants with sufficient growing area both above and below ground to effectively buffer the scale of built structures.

outline development plan
A plan to guide the future development of land and may form either a component of the Plan, or be approved under the provisions of the Plan.

outstanding natural features and landscapes
A feature or landform listed in Appendix 6A: Outstanding Natural Features and Landscapes which has exceptional qualities for more than one of the following criteria:

- Natural science factors;
- Aesthetic values;
- Expressiveness (legibility);
- Transient values;
- Shared and recognised values;
- Maori values;
- Historical associations.

packhouse
Means a building in which horticultural produce is packed for sale.

papakainga
Means development by tangata whenua of land held under the Te Ture Whenua Maori Act (1993), in the traditional rohe of those tangata whenua and developed for residential, social, cultural, economic, conservation and recreation activities.

parking impact fee
A financial contribution toward the construction of carparking facilities in lieu of the physical provision of on-site carparking.

pedestrian environment street
Means a road, specifically identified in the Plan Maps (Part B) where there is a focus on creating a pleasant pedestrian environment supported by rules of the Plan.

permanently flowing river or stream
Includes both the modified and unmodified watercourses with a defined channel and banks which are subject to year-round flowing water of the:

- Wairoa River;
- Waiorohi Stream and associated tributaries;
- Waimapu Stream and associated tributaries;
- Kopurererua Stream and associated tributaries;
- Kaitemako Stream;
- Waitao Stream and associated tributaries;
- Arateka Stream;
- Puketanui Stream and associated tributaries;
- Wairaka Stream and associated tributaries;
- Kaituna River;
- Those unnamed rivers/streams.
  as identified in Diagram 14, Section 5 of Part B (Plan Maps).

pig farming
The keeping of pigs for commercial purposes and includes:
a) Intensive pig farming - the keeping of pigs within buildings, or at a stocking density which precludes ground cover being maintained;
b) Extensive pig farming - the keeping of all stock in paddocks with ground cover maintained commensurate with surrounding properties, and only relocatable shelters used.

places of worship
Land or buildings used for public or private religious worship, religious ceremonies, religious meetings or instruction and social gatherings directly related to the work of the religious organisation. They include ancillary administration facilities and ancillary community support services, (including schools, tertiary education premises and health centres).

the plan
This Tauranga City Plan, the Objectives, Policies and Rules (Part A), and the Plan Maps (Part B).

plan area
Means an area of the Plan where special rules apply based on the particular resource management issues associated with a defined geographic area. These Plan Areas are identified in the key of Part B (Plan Maps), and include the:

a) Coastal Hazard Erosion Plan Area and Coastal Protection Plan Area;
b) High Voltage Transmission Plan Area;
c) Scheduled Sites;
d) Commercial Plan Areas;
e) High Rise Plan Area;
f) Medium Rise Plan Area;
g) Flood Hazard Plan Area;
h) Special Ecological Areas;
i) Outstanding Natural Features and Landscapes and Important Amenity Landscape Plan Areas;
j) KiwiRail Reverse Sensitivity Plan Area;
k) NZTA (New Zealand Transport Agency) Reverse Sensitivity Plan Area.

port activity
Activities necessary to the operation of the Port of Tauranga including:

a) Handling, storage, processing, consignment and transportation of cargo;
b) Construction, maintenance or repair of Port operational facilities;
c) Port offices and personnel facilities;
d) Navigational aids and equipment.

And also includes industrial activities that for operational purposes require location near the Port, including:

i) Commercial fishing facilities;
ii) Marine storage, repair, servicing and maintenance facilities.

Note: This definition addresses a collection of activities and some of these are covered by terms that are defined elsewhere in the Plan.

potentially contaminated land
Any location for which there are reasonable grounds to suspect that contamination of land may have occurred, based on information about past land uses at that location, or on evidence from or near the land itself. Past land uses that may lead to contamination are outlined in the Ministry for the Environment’s Hazardous Activities and Industries List (HAIL) appended to Chapter 9 - Hazardous Substances and Contaminated Land. Potentially contaminated land includes land that is classified in the Bay of Plenty Regional Council’s Selected Land Use Register as Verified Site History and Unverified Site History of HAIL.

practicably moved
The activity, building (including foundations) or structure is able to be physically moved clear of the Coastal Hazard Erosion Plan Area within a 10 working day period (as defined in the Resource Management Act 1991 (RMA)), from the start of such relocation activity, by way of a removal truck, a roller or rail system or crane, and that access can be gained to the site to move the building, to the satisfaction of Council.
Note: The abandonment and/or total demolition and removal of debris of the activity, building or structure does not meet the definition of “practically moved”.

**primary production**
Any of the following activities, whether singularly or in combination, for commercial gain or exchange:

a) The cultivation of land;
b) The keeping, maintenance and farming of animals and birds (including poultry) for the production of meat, fibre, or other animal-derived produce (including offspring);
c) Aquaculture (fish farming and hatcheries, shellfish farming, seaweed gathering and processing);
d) Horticulture (including all forms of fruit, vegetable, flower, seed, or grain crop farming).

**primary street frontage**
Means the street frontage of a site that is the highest order road as determined by the roading hierarchy of the Plan, or where frontages have the same status under the hierarchy that frontage that is dominant in terms of pedestrian movements.

**principal building**
The predominant building on a site in terms of size, scale and/or the activity located within that building being a primary function on the site, as distinct to an ancillary building.

**principal independent dwelling unit**
In the context of the development of a secondary independent dwelling unit is the independent dwelling unit on the site to which the secondary independent dwelling unit is ancillary.

**produce stall**
Any building or part of a building from which goods are sold or offered for sale, being produce grown on the site or goods manufactured on the site on which it is located.

**public amenities**
Is for the purpose of Chapter 11 – Financial Contributions and means facilities, open spaces, plazas, libraries, halls, community centres and the like provided for public use, recreation and enjoyment.

**public floor area (PFA)**
The sum of any internal floor area of a building freely accessible to the general public or patrons and measured from the inside of exterior walls. It includes toilet and ablution facilities, defined on-site external areas intended for occupation by the public such as outdoor dining/bar facilities and display areas, but excludes space occupied by internal walls, lift shafts, hallways and stairwells, carparking areas, vehicular loading and unloading areas, fire exits, and any area for which access is restricted solely to employees or operators of the premises.

**public recreational facilities and activities**
Means:

a) Skateboard bowls and outdoor skate parks;
b) Boat ramps, jetties and boat-launching facilities;
c) Playing fields, sports grounds, hard courts, greens and golf courses;
d) Structures such as goal posts, cricket nets, fences and other similar structures which are ancillary to and used in conjunction with playing fields, sports grounds, hard courts, greens and golf courses;
e) Lighting, including support structures;

for the use and enjoyment of the public.

**race**
The time encompassed by the drop of the green flag to commence the race, to the display of the yellow lights after the last car in the race has received the chequered flag.

**race season**
The period from the 1 October in any calendar year to 31 May the following calendar year.

**reduced level (RL)**
The height above a specified datum, which is mean sea level (moturiki datum).

**renewable energy generation**
Means energy produced from solar, wind, hydro, geothermal biomass, tidal, wave and ocean current sources.
reserve
Has the same meaning as contained in the Reserves Act 1977, and also includes other public land not classified as a reserve but used or managed for the use and enjoyment of the public.

reserve
For the purpose of Chapter 11 – Financial Contributions and means the provision of land for recreation, conservation, amenity and utilities such as stormwater catchment areas. These areas contribute to the open space network which provides community focal points, pedestrian and open space connections, high levels of amenity and feelings of openness, and a range of recreational opportunities.

residential activity
Means:

a) The use of land and buildings for domestic or related purposes by persons living alone or in family and/or non-family groups (whether any person is subject to care, supervision or not) and includes, retirement villages and residential health care facilities providing 24-hour on-site medical support to residents, independent dwelling units, housing for the elderly, shared accommodation, private functions and incidental private gatherings;

b) Residential activity shall exclude visitor accommodation and homestay and shall exclude caravans or other mobile forms of accommodation, unless they are utilised as a residential activity for periods of more than 3 months in any one calendar year.

Note: This definition addresses a collection of activities and some of these are covered by terms that are defined elsewhere in the Plan.

residential allotment
An allotment on which a residential building or relocated dwelling/building would normally be expected to be erected or positioned, including:

a) Any lease area on a cross-lease plan;

b) Any unit on a unit plan.

residential building
Any building or part of a building used or intended to be used for human habitation.

residential density
The density of independent dwelling units on a site and includes low density, medium density, and high density residential development.

residential outlook
The field of view as seen from a habitable room.

residential zones
The Suburban Residential, Wairakei Residential, Urban Marae Community, Ngati Kahu Papakainga, High Density Residential, Large Lot Residential and the City Living Zones.

rest home
A building incorporating a number of bedrooms used to provide rest home care in accordance with Section 9 of the Health and Disability Services Act 2001 for persons who require medical and/or other forms of support (including dementia care) and includes the facilities and staff necessary to provide such support.

retail
The sale of goods to the consumer of those goods.

retirement village
Part of any property, building, or other premises that contains two or more independent dwelling units or their dwelling unit equivalents that provide residential accommodation in the form of independent living townhouses and/or apartments and/or supported living provided on a bed and/or room basis (for avoidance of doubt this includes rest home and/or dementia care), predominantly for persons in their retirement (including their spouses or partners), together with associated services and facilities.

Note: This definition addresses a collection of activities and some of these are covered by terms that are defined elsewhere in the Plan.
d) Owner-occupied residential units registered under the Unit Titles Act 2010 or owner-occupied cross-lease residential units that in either case do not provide services or facilities to their occupants beyond those commonly provided by:
   i) similar residential units that are not intended to provide accommodation predominantly for retired people and their spouses or partners; or
   ii) residential units occupied under tenancies to which the Residential Tenancies Act 1986 applies;

e) Boarding houses, guest houses, or hostels;

f) Halls of residence associated with educational institutions; and

g) Shared accommodation.

**RMA**

**road hierarchy**

The network of public and private roads that provide for the movement of vehicular traffic through the City, and is comprised of:

<table>
<thead>
<tr>
<th>Type of Road</th>
<th>Primary Function/Generalised Description</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Expressways and motorways (including indicative expressways and motorways)</td>
<td>To provide for the movement of regional or inter-regional traffic. Access limited to intersecting roads.</td>
<td>All roads declared to be motorways or expressways.</td>
</tr>
<tr>
<td>Primary Arterial (including indicative primary arterials)</td>
<td>Main roads other than motorways and expressways joining significant centres of population and/or providing for regional and inter-regional traffic flow.</td>
<td>Means those roads that form part of a network of nationally or regionally important arterial roads. Nationally important routes are managed as State Highways, whereas other primary arterial roads may be managed by territorial authorities. These routes predominantly carry through traffic, and carry the major traffic movements in and out of the City. The primary function of the road is traffic movement with access limited.</td>
</tr>
<tr>
<td>Secondary Arterial (including indicative secondary arterials)</td>
<td>Roads joining smaller centres of population and larger centres of population to nearby primary arterials or linking between primary arterials.</td>
<td>Means those roads that cater for traffic movement between the major areas of the City. The primary function of the road is traffic movement. Access may be limited to ensure the safe and efficient operation of the transport network.</td>
</tr>
<tr>
<td>Collector (including indicative collector)</td>
<td>Wider urban roads linking local roads to the arterial network. In rural areas, minor roads linking smaller rural communities to the arterial network. Collector Roads have both a traffic movement function as well as an access role.</td>
<td>Means those roads that are principally collecting and distributing traffic to and from the arterial road network, but may act as links between two arterial roads (being Primary Arterial Roads and/or Secondary Arterial Roads). These roads also act as local main roads supplementing Secondary Arterial Roads. Local through-traffic generally makes up a high proportion of traffic flow but these roads are not intended to cater for large numbers of national, regional or City through-traffic movements because of likely effects on the adjoining road environment and amenities, and the limited physical capabilities of such roads relative to Primary Arterial Roads and Secondary Arterial Roads. Access may be controlled to ensure the safe and efficient function of the roading network.</td>
</tr>
<tr>
<td>Local</td>
<td>Roads providing direct access for residential and other areas of development in urban areas, with more than one intersection to other local or collector roads. Cul-de-sacs are local roads with intersections to other local roads at one end only.</td>
<td>Means those roads that are intended to principally provide direct access to adjoining properties. Many local roads, except cul-de-sacs, also collect and distribute traffic to and from other roads within the City. Traffic flows are usually low, and these roads are intended to cater for only minimal through or extraneous traffic because of effects on the adjoining road environment and amenities, and the limited physical capabilities of such roads.</td>
</tr>
<tr>
<td>Service Lanes</td>
<td>Land vested as road for the purpose of providing access, generally, but not limited to, commercial and industrial activities. The service lane provides an access function only and does not provide for frontage in the case of subdivision.</td>
<td>Means any lane laid out or constructed for the purpose of providing the public with a side or rear access for vehicular traffic to any land. This can also apply to residential areas, for example with rear laneways.</td>
</tr>
</tbody>
</table>
**road zone (unless otherwise stated)**
Covers any public road, regardless of the underlying zoning on the Plan Maps (Part B) including a State Highway and any service lane.

**rural character**
*Rural character* includes but is not limited to the following elements:

a) A predominance of natural features over human made features;

b) High ratio of open space relative to the built *environment*;

c) Significant areas of vegetation in pasture, crops, *forestry* and/or *indigenous* vegetation, including crop protection *structures*;

d) A rural working production *environment*;

e) Presence of farmed animals;

f) Noises, smells and effects associated with the use of rural land for a wide range of agricultural, horticultural and *forestry* purposes;

g) Low population densities relative to urban areas.

**rural contractors depot**
Means land and or *buildings* used for the purpose of storing equipment associated with a business which wholly serves the farming community.

**rural zones**
Means the Rural, Rural Marae Community, Greenbelt and Future Urban zones.

**school**
Land and/or *buildings* used to provide regular instruction or training of children including pre-schools, *childcare* facilities, primary, intermediate and secondary *schools*, work skills training centres, outdoor education centres and sport training establishments, and their ancillary administrative, cultural, health, recreational or communal facilities. This term excludes *tertiary education premises* and *home based childcare*.

**secondary independent dwelling unit**
An independent dwelling unit secondary to the principal independent dwelling unit on the same *site* and held under the same title.

**secondary street frontage**
Means the street frontage of a *site* that is not the primary street frontage.

**sensitive area**
Means an area identified between 0 metres and 10 metres above the permitted *height* of the zone within an identified *viewshaft protection area* as identified on the Plan Maps (Part B).

**sensitive zone**
All *Residential zones*, *Open Space Zones*, Rural Marae Community zone, Rural Residential zone, Education Centre Zones.

**service area**
Means an area set aside for the exclusive use of a dwelling unit for the purpose of providing domestic storage.

**service connection**
Has the same meaning as in section 197 of the Local Government Act 2002 which means: a physical connection to a service provided by, or on behalf of, a territorial authority.
service station
Any premises used for the sale of motor fuels and lubricants by retail and includes:
Mechanical workshops and servicing;
a) Ancillary retail sale of goods and food;
b) Vehicle washes;
c) The hire of vehicles and trailers;
d) The storage and retailing of LPG and CNG.

services
The minimum level of on-site service required in a zone to accommodate the transport, stormwater, water and wastewater demands of land use activities in a manner that is both consistent with the purpose of the underlying zone and the anticipated demand or capacity of local and City-wide infrastructure.

setback
That distance from a building, structure or activity to the boundary of the site on which that building, structure or activity occurs. The distance of the setback is determined by rules in the relevant zone, and includes:
a) Front setback - that part of a site on any lot that has direct frontage to a road, being a line extending across the full width of the site parallel to the boundary adjoining the road, notwithstanding the presence of any segregation strip;
b) Rear setback - that part of a site on any lot other than a corner site, being a line extending across the full width of the site parallel to the legal boundary furthest from the road frontage of, or access to the site;
c) Side setback - a line extending across the full width of the site parallel to the legal boundary not fronting a road or defined as a rear boundary;
d) In respect of a corner site every setback not fronting on to a road frontage shall be deemed to be a side setback;
e) In respect of rear sites all setbacks except that deemed to be the rear setback shall be side setbacks.

shall remain vacant
That the area shall not be developed, landscaped or otherwise contoured, or planted in trees in such a way that would prevent the relocation of the subject building or structure. The provision of setbacks, on-site carparking, access and manoeuvring areas in accordance with the rules for the Suburban Residential Zone in the Plan are allowed. Construction of buildings or structures that require building consent prior to the relocation of the subject buildings will not be allowed. For guidance the construction, erection and placement of minor structures and works on private property, as well as buildings designed and constructed to be able to be removed so that relocation of the subject building can be physically undertaken within 10 working days, may be appropriate on the alternative building site.
**shared accommodation**
A **building** incorporating a number of bedrooms utilising a shared kitchen and intended to be used as a residence for a group of people unrelated to each other and acting independently of each other in their day-to-day activities. A kitchen shall, as a minimum, provide for the preparation, cooking and refrigerated storage of food. The definition of **shared accommodation** shall not apply to households of 6 or fewer inhabitants. Such households shall be deemed to occupy an **independent dwelling unit**.

**showhome**
Means a **building**, or part of a **building**, constructed as an **independent dwelling unit**, that is displayed and promoted to encourage people to buy or construct similar **residential buildings** at a different **site**, and may be sold to remain on the same **site** as an **independent dwelling unit**.

**sign**
Any display or device whether or not placed on land or affixed to a **building**, stationary vehicle or **structure**, intended to attract attention for the purposes of directing, identifying, informing, or advertising, and which is visible from a public place.
For the purposes of the **Plan** the area of a **sign** shall be a measurement of that **sign**’s face or total message visible from a public place.

**significant archaeological area**
An area of land identified as having a high degree of archaeological value as identified in **Appendix 7D – Register of Significant Archaeological Areas** or **Appendix 7E – Te Tumu Archaeological Management Areas**

**significant groups of trees**
Means a group of trees listed in **Appendix 6F - Significant Groups of Trees Register** which forms part of the **landscape character** of an area of the **City** and consists of the following:

a) At least one **notable tree** listed in **Appendix 6E – Notable Trees Register**; and

b) Trees that are physically close to each other or which form a collective or functional unity through meeting at least one of the following criteria:
   i) Canopies are touching; or
   ii) Canopies are overlapping; or
   iii) Canopies are not further than 5 metres apart; and

c) Trees that are either:
   i) At least 15 metres high;
   ii) Have single trunk diameter (measured at 1.4 metres above ground level) of 300mm or more; or
   iii) Have an aggregate trunk diameter of 300mm or more (measured at 1.4 metres above **ground level**) measured from a total of up to three trunks;

but excludes any plant pest species identified by the Bay of Plenty Regional Council and Phoenix palms less than 10 metres in **height**.

**significant maori area (SMA)**
An area of land identified as having a high degree of cultural and traditional significance to Tangata Whenua and Iwi as identified in **Appendix 7B: Register of Significant Maori Areas**.

**site**
An area of land which complies with the provisions of the **Plan** as regards the minimum frontage, area, and configuration and which (being all the land comprised in one Certificate of Title) may be disposed of separately, but excludes:

a) A parcel of land which has been or may be disposed of separately for the purposes of a public **reserve** or public work or which may be disposed of to an adjoining owner subject to a condition imposed by section 220(2) of the **Resource Management Act 1991** (requiring the issue of one Certificate of Title for more than one allotment);

b) An allotment comprising a **building** or part of a **building** shown or identified separately on a survey plan for the purposes of the issue of a cross-lease or company lease, or a principal unit or accessory unit on a unit plan.
site coverage
Means that portion of a site area which may be covered by buildings or parts of a building that are enclosed by the face of any exterior wall of the building, including exterior walls above ground floor level, but excludes:

a) open decks and or balconies which may be covered for sun protection;
b) open carports;
c) any part of the eaves (including guttering);
d) pergolas;
e) structures below ground level.

site layout
Means the arrangement of buildings, structures and landscape elements on a site and includes patterns of vehicle and pedestrian access.

small and community-scale distributed renewable energy generation
Renewable electricity generation projects with an installed electricity generation capacity of less than four megawatts and excludes offshore wind, tidal and wave generation. It does not include the transmission electric lines required to link the energy facility to the electricity network.

speedway activities and events
Spectator facilities and services and associated management and administration.

speedway racing
The racing of motor vehicles on an oval shaped dirt track, including pit activities and ancillary activities.

standard tree evaluation method (STEM)
The method used to evaluate notable trees or heritage trees using a set of descriptive feature headings set against a scale of merit points given for the quality of those features.

stormwater overland flowpath
The natural or artificially earthworked route taken by stormwater which becomes concentrated as it flows overland, making its way downhill following the path of least resistance towards the stormwater network, rivers, streams harbour or coast. Stormwater overland flowpaths include secondary flow paths which result when the piped stormwater system gets blocked or when the capacity is exceeded. For the purposes of this definition, a stormwater overland flowpath includes an artificially designed route utilising formed or hard surfaces.

stormwater reserve
Land associated with or used for the purpose of the treatment, storage, conveyance, or discharge of stormwater. Stormwater reserves may contain detention or retention ponds, natural or manmade watercourses, stormwater overland flowpaths, culverts, pipelines and associated structures.

stormwater run-off
Means that portion of rainfall which flows directly from land or any impermeable surface into a natural waterbody or built disposal systems (eg, drains, channels or designated ponding areas).

strategic road network
That part of the transport network that includes motorways, expressways, primary arterials and secondary arterials.

streetscape
The visual appearance of a street and its surrounds, and includes geometry of street pattern and subdivision, width and length of streets, degree of enclosure, building setbacks from the street, fencing and street design, and the contribution that vegetation makes to the appearance of the street.

structure
Any building, equipment, device or other human-made facility which is fixed to the land.
subdivision

<table>
<thead>
<tr>
<th>Has the same meaning as contained within Section 218 of the Resource Management Act 1991 (RMA) which means:</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) The division of an allotment:</td>
</tr>
<tr>
<td>i) By an application to a District Land Registrar for the issue of a separate certificate of title for any part of the allotment; or</td>
</tr>
<tr>
<td>ii) By the disposition by way of sale or offer for sale of the fee simple to part of the allotment; or</td>
</tr>
<tr>
<td>iii) By a lease of part of the allotment which, including renewals, is or could be for a term of more than 35 years; or</td>
</tr>
<tr>
<td>iv) By the grant of a company lease or cross lease in respect of any part of the allotment; or</td>
</tr>
<tr>
<td>v) By the deposit of a unit plan, or an application to a District Land Registrar for the issue of a separate certificate of title for any part of a unit on a unit plan; or</td>
</tr>
<tr>
<td>b) An application to a District Land Registrar for the issue of a separate certificate of title in circumstances where the issue of that certificate of title is prohibited by section 226; and the term subdivide land has a corresponding meaning.</td>
</tr>
</tbody>
</table>

sub-region

Means the area covered by the Council and the Western Bay of Plenty District Council.

substation

Has the same meaning as in the Electricity Regulations 1997 which means:

Those parts of works or electrical installations, being a building, structure, or enclosure, incorporating fittings that are used principally for the purposes of the control of the distribution of electricity.

surf life saving buildings (including clubrooms)

Means the use of land and buildings which are used for the primary purpose of surf life saving and includes storage, changing rooms, lookout tower, office room, first aid room, clubroom and includes ancillary fundraising activities and community use other than for individual financial reward or profit.

take-away food premises

Means premises primarily selling prepared food for consumption off the premises and which may or may not serve customers in their vehicles.

tangi

The funeral process and act of mourning by Maori.

tara road urban growth plan area

Means the land within the Tauranga City Council territory that is located south of Tara Road and north of the designation for the Tauranga Eastern Link, as shown on UG5, Section 6, Urban Growth Plan (Plan Maps, Part B) and zoned Rural Residential on Sheet L71, Section 1,(Plan Maps, Part B)

tauranga ecological district

The area of land situated in the western Bay of Plenty, between the eastern foothills of the Kaimai-Mamaku range and the Pacific Ocean, encompassing the western half of the coastal dune systems that stretch between Waihi Beach and Opotiki.

tauriko business estate

Means the commercial and industrial area of Tauriko comprised of the Tauriko Commercial Zone and Tauriko Industry Zone, together with areas of the Greenbelt and Road Zones.

telecommunication line

Means 'line' as defined in Section 2(1A) of the Telecommunications Act 1987 which means a wire or wires or a conductor of any other kind (including a fibre optic cable) used or intended to be used for the transmission or reception of signs, signals, impulses, writing, images, sounds, or intelligence of any nature by means of any electromagnetic system; and includes any pole, insulator, casing, fixture, tunnel, or other equipment or material used or intended to be used for supporting, enclosing, surrounding, or protecting any such wire or conductor; and also includes any part of a line.

temporary activity

Means:

a) A temporary building associated with an approved building or construction project;

b) Use of a caravan or other mobile form of accommodation for the purpose of accommodation;
c) Individual carnivals, fairs, galas, public meetings, filming, concerts, sporting and other special events and associated temporary buildings, structures and temporary cell sites for mobile phone usage that comply with the New Zealand Standards relevant to electromagnetic emissions;

d) Temporary military training activities undertaken for defence purposes (as defined in the Defence Act 1990).

temporary commercial use
An activity which requires a charge to participate or involves the sale of goods or hire of equipment, products or materials to persons using land or buildings in an Open Space Zone.

temporary sign
Means any sign not intended for permanent display, on a site or on a road, or which is erected and removed in relation to:

a) A community event;
b) Electioneering;
c) Construction sites;
d) Hazard identification and warning;
e) Selling of land or buildings;
f) A statutory process as required by legislation.

Note: See also the definition of sign.

temporary storage areas
Means an area set aside for the storage of goods, materials, plant machinery or equipment and solid waste associated with the routine maintenance, renewal or minor upgrading (in relation to electric lines) of network utilities where the storage associated with such works does not exceed a period of 30 consecutive days within one calendar year.

tertiary education premises
Land and/or buildings used to provide regular instruction or training not meeting the definition of school and includes tertiary education institutions, work skills training centres, outdoor education centres and sport training establishments and their ancillary administrative, cultural, recreational or communal facilities.

trade suppliers
Means a business engaging in sales whose products wholly consist of one or more of the following categories:

a) Automotive or marine supplies;
b) Building supplies;
c) Catering equipment;
d) Farming and agricultural supplies;
e) Garden and outdoor equipment;
f) Hire services;
g) Industrial supplies.

traffic calming
The use of obstacles, differing surfaces, bends, humps and other such similar devices to moderate the speed of motor vehicles along a public or private road or vehicle/accessway.

transit storage
Any goods, merchandise or other property whether or not within a container in respect of which Port of Tauranga provides storage for a period of less than 7 days.

transmission electric line
An electric line that conveys electricity between generating power stations and the point of supply, being either direct to end users or to the distribution system.

transport network
The combined network of roads, pedestrian routes and linkages, air and sea routes that provide for the movement of people and goods to, from and through the City.
two-bedroom dwelling
An independent dwelling unit that has not more than three rooms, excluding a kitchen, laundry, bathroom, toilet or any room used solely as an entrance hall, passageway or garage. Two-bedroom dwelling unit also means a dwelling unit in a retirement village that is registered pursuant to section 10 of the Retirement Villages Act 2003 that does not meet the definition in the previous sentence or the definition of a one-bedroom dwelling.

unit of demand
Is for the purpose of Chapter 11 – Financial Contributions and means the number of dwelling units, or dwelling unit equivalents, or an additional allotment of subdivision, or the equivalent demand from non-residential development for infrastructure and reserves proposed in response to city growth.

urban growth area
An area of anticipated subdivision or development identified in the Section 6, Urban Growth Plans (Plan Maps (Part B)), or for the purpose of Financial Contributions, a part of the City where residential and/or business growth is expected and in which growth-related local infrastructure projects have been identified. Urban growth areas are identified in the Financial Contribution Urban Growth Areas Diagram 5, Section 5, Plan Maps (Part B).

urupa
A traditional graveyard or burial site of tangata whenua. These can include both registered and unregistered burial sites or places where skeletal remains have been laid to rest (such as caves, hollow trees or sand dunes). Associated with death, they are tapu.

ventilating windows
Windows, doors or other openings that are openable to the outside, and are responsible for providing natural ventilation for their room. Any room's ventilating window, door or other openings to the outside shall have a net openable area of no less than 5% of the room's floor area.

versatile land
Land categorised under the New Zealand Land Use Capability System as being classes i, ii and iii.

viewshaft protection area
A corridor through which an Outstanding Natural Feature and Landscape can be viewed, as identified on the Plan Maps (Part B).

visitor accommodation
Land or buildings occupied as a residence on a temporary (periods of up to three months occupation during any 12-month period) basis and includes backpackers’ accommodation, motels, hotels, tourist lodges, holiday flats, tourist cabins, motor inns and ancillary workrooms, reception areas and accessory buildings or ancillary activities on the site. This definition includes property held in common ownership where ownership by each owner is limited in duration to less than 3 months during any 12-month period. This definition does not include activities defined in the Plan as an independent dwelling unit, shared accommodation, residential activity or homestay.

visitor accommodation
For the purpose of Chapter 11 – Financial Contributions means land or buildings which are offered for temporary accommodation of persons and includes bed and breakfast establishments, backpackers’ accommodation, homestay facilities, motels, hotels, tourist lodges, holiday flats, tourist cabins, motor inns and ancillary workrooms, reception areas and accessory buildings or ancillary activities on the site. It does not include activities that constitute a dwelling unit or residential activity nor any developments in which each unit is separately unit titled. Each unit which is separately unit titled will be assessed as a dwelling unit.

visitor accommodation unit
An accommodation unit used for the purpose of visitor accommodation.

visually permeable – In reference to a wall, gate, door or fence:
Means a continuous vertical or horizontal gaps of at least 50mm width occupying not less than one third of its face in aggregate of the entire surface or where narrower than 50mm, occupying at least one half of the face in aggregate.
**wairakei town centre zones**
Means the Wairakei Town Centre Core Zone and/or the Town Centre Fringe Zone.

**walkway**
Any walkway, footpath, or pedestrian way along which pedestrians may traverse.

**waste management facilities**
Land and/or buildings associated with the transport, processing and disposal of solid and liquid waste including transfer stations and refuse recycling centres.

**wastewater**
Means all foul water emanating from a site, excluding stormwater run-off, but including effluent.

**water supply reservoir**
Means a reservoir for water storage intended for bulk community supply. For the purposes of this definition a water supply reservoir does not include individual water tanks which store water for drinking and firefighting purposes.

**wetland**
Shall have the same meaning as contained in the Resource Management Act 1991 (RMA) which means permanently or intermittently wet areas, shallow water, and land water margins that support a natural ecosystem of plants and animals that are adapted to wet conditions.

**whanau**
The basic unit of Maori social structure. It typically comprises an extended family possibly including great-uncles and great-aunts, once or twice removed. Whanau may not necessarily live together, but nevertheless share mutual interests.

**wind energy facility**
The land, buildings, substations, turbines, structures, earthworks, access tracks and roads associated with the generation of electricity by wind force and the operation of the wind energy facility.
It does not include:
a) Small and community-scale distributed renewable electricity generation;
b) The transmission electric lines required to link the wind energy facility to the electricity network.

**yard based suppliers**
Any retail activity selling or hiring products for construction or external use (including activities such as vehicle and garden supplies) where more than 50% of the display area is located in a covered or uncovered yard. External carparking and manoeuvring areas are excluded from the yard area for the purpose of this definition.
